# Bluti

## Super Juice

**DRINK HEALTHIER,  
SEE BETTER**

### ABOUT THE PRODUCT

Bluti Super Juice sources its quality blueberries from certified farms across America. Every packet of Bluti is manufactured using YiJia's patented extraction formula at a GMP-certified facility in the United States. The manufacturing process is also held at the utmost stringent standards to ensure quality is delivered. In addition, the Bluti Super Juice is also designed for convenience, allowing you to consume it easily on the go. The product combines blueberries and resveratrol that are rich in antioxidants with high ORAC (oxygen radical absorbance capacity) fruit blend and fucoidan. With these powerful ingredients and nutrients, Bluti can have a positive effect on skin, metabolism, and eye health\*.

- Vegan
- Gluten Free
- Non-GMO
- No Sugar Added

### KEY BENEFITS

- Supports Eye Health\*
- Has a Positive Effect on Aging Skin\*
- Supports Metabolism\*

### FEATURED INGREDIENTS

#### Blueberries

are called “the queen of fruits” and “the king of berries,” and are the “No.1 antioxidant” among vegetables and fruits. They are also rated as “one of the world’s top five health products” by the United Nations Food and Agriculture Organization. Blueberries are rich in multiple vitamins, fiber, flavonoid and polysaccharide compounds and are especially infused with anthocyanin. They are clinically studied to improve vision.\*

#### Resveratrol

is a polyphenol nonflavonoid compound present in highly pigmented vegetables and fruits such as

blueberries. Research has shown that it's one of the most effective anti-aging and antioxidative ingredients. Resveratrol is also clinically tested to support metabolism in addition to having positive effects on aging skin.\*

### **Fucoidan**

is a natural algal polysaccharide extracted from brown seaweed. It has been extensively researched to be a good source of dietary fiber. This type of polysaccharide is clinically studied to support metabolism.\*

### **The High ORAC Fruit Blend**

of Bluti powers the product with the help of grapes, cranberries, pomegranates, blueberries, apples, mangosteens, bilberries, aronia berries, and goji berries. These fruits are all considered of high ORAC (Oxygen Radical Absorbance Capacity) values, meaning they have a great "total antioxidant capacity" (TAC). This feature is clinically tested to benefit aging skin and provide good help to metabolism.\*

### Grapes

are packed with vitamin C and vitamin K, supporting eye health.\*

### Cranberries

are known for offering antioxidant benefits.\*

### Pomegranates

are loaded with fiber, vitamins C and K, therefore can help to support metabolism.\*

### Apples

are rich in antioxidants, flavonoids, and dietary fiber that are known for the positive effects on aging skin.\*

### Mangosteens

are a great source of antioxidants, which offer various internal and external health benefits.

### Bilberries

are richly loaded with antioxidants, giving skin a healthy boost.\*

### Aronia Berries

are known for being low in sugar content, which makes a perfect fruit to add to daily diets.

### Goji Berries

are packed with dietary fiber, antioxidants, and amino acids that have various health benefits.

## **Q&A**

**Bluti Blueberry Juice produces very good effects. Is it better to drink it as much as possible to see the effects faster?**

Bluti contains active ingredients such as resveratrol, blueberry and fucoidan, which can help boost immunity. You should drink it according to your body condition. It is recommended that you drink it twice a day, 2 oz each time.

**Can Bluti be added in water? What is the appropriate ratio of Bluti to water?**

Bluti Blueberry Juice can be added in water in any ratio or mixed with other juices for consumption, but we do not recommend adding hot water as the nutrients in Bluti will be destroyed. However, we found that most people prefer the original flavor.

**Can pregnant women, children and people with diabetes drink Bluti Blueberry Juice?**

Bluti Blueberry Juice contains no harmful ingredients, but physical conditions vary from

person to person. It is recommended that pregnant women, children under 7 years of age, and people with diabetes and other health problems consult a physician before drinking the product.

### **Are all the ingredients of Bluti Blueberry Juice from the United States?**

The main ingredients of Bluti Blueberry Juice, namely blueberry juice concentrate and white grape juice concentrate, are sourced from the United States. The other ingredients are sourced from the producing countries where their quality is among the highest.

### **How is the resveratrol in Bluti extracted?**

The resveratrol content in grape skin is high, and the resveratrol in Bluti is extracted from grape skin. After the grape skin is rinsed and dried in the sun, its resveratrol content is concentrated and extracted through a water and ethanol extraction technique. Finally, a pure powder extract containing no residual solvent is obtained.

### **How is Bluti Blueberry Juice distinguished from other juices on the market?**

Bluti combines four star ingredients, namely blueberry, resveratrol, fucoidan and high ORAC fruit blend, which have antioxidant and polyphenolic properties that go beyond the effects of drinking blueberry juice alone. This unique formula offers great benefits to the human body.

### **If Bluti is made from all-natural blueberry juice, why is natural blueberry flavor still added as an ingredient?**

Bluti is made from all-natural blueberry juice combined with high ORAC fruit mix. It also contains powerful antioxidant ingredients such as

resveratrol. In order to make BLUTI taste better, natural blueberry flavor is added to satisfy most people. Because of its natural blueberry flavor and the absence of harmful substances, everyone can drink it with peace of mind.

### **Do the preservatives added in Bluti affect one's health?**

Consumers can see a lot of foods labeled “preservative-free” on the market, so there is a misunderstanding about foods with preservatives. Statistics show that many food safety problems can be said to result, to some extent, from not adding preservatives as required. At the same time, according to quality and technology supervision people, the use of preservatives according to certain standards guarantees food safety: as long as preservatives are added according to standards, they are not harmful to the body.
