MAIONE™

Miraculous skincare regimen
featured with biotech and herbology.

Keep Age a Secret

MAIONE™ FLEXIBLE LIPOSOME MASK

Absorb

Your skin will be in a closed state while applying the mask within 15–20 minutes. Your skin pores will be effectively opened and it allows the skin to efficiently absorb nutrients.

Cleanse

People who put on make-up often are prone to cosmetic residues. Applying a facial mask may soften the cuticle layer and discharge the makeup residues from the pores.

Relax

While applying the facial mask, your facial muscles will be gently relieved and you'll experience the relaxing sensation.

1

Proprietary Ingredient From Seed To Seal

Hainan Dalbergia Odorifera Extract

2

Renowned International Certifications

FDA regulation complied
GMP certified

3

Advanced Technologies

Flexible Liposome
Peptide and Carnosine
Tencel Sheet

6

Safety Guarantees

No Antibiotic & Artificial Flavor
& Animal Cruelty
No Bleach & No Emulsifier
No Hormone & Heavy Metals
No Mineral Oil & No Pigment

5

Significant Effects

Help with Oil Balance
Retain Moisture, Hydrate Skin
Lift and Firm
Help Repair Skin
Relieve Sensitivity

4

Major Natural Ingredients

Hyaluronic Acid
Algae Extract
Rosewood Oil
Plant Protein (Wheat)

MAIONE™ FLEXIBLE LIPOSOME MASK

1 Proprietary Ingredient: From Seed to Seal

Yijia built the one and only Hainan Dalbergia Odorifera plantation which is equipped with the in-house R&D team and equipment. The team is dedicated to realizing a perfect merge between technologies and carefully selected natural ingredients in all YIJIA

products. The plantation of Dalbergia Odorifera is located in the untouched pristine tropical rain forest in Hainan China. For centuries, the extremely scarce Hainan Dalbergia Odorifera has been regarded as the precious Chinese herbal medicine and used to make luxury wood antiques. The leaves are made into high-quality tea as well. The trees leaves could only be plucked between 5 to 10 o'clock in the morning within 45 days of a year. Therefore, Dalbergia Odorifera lives its reputation up for the preciousness and rareness.

Dalbergia Odorifera is deemed as Chinese medicine in the Chinese ancient herbology masterpiece "Compendium of Materia Medica" and it's a powerful natural plant good for our body and skin. Dalbergia Odorifera extract is able to boost the skin immunity and metabolism, rejuvenate your skin and make it supple, relieve inflammation and balance skin PH.

1 Proprietary Ingredient: From Seed to Seal

DALBERGIA ODORIFERA EXTRACT

ONE AND ONLY PROPRIETARY INGREDIENT

MAIN BENEFITS

Antibacterial, Anti-inflammatory
Boost skin immunity
Enhance skin metabolism
Balance skin PH, Maintain skin health

1

Proprietary Ingredient From Seed To Seal

Hainan Dalbergia Odorifera Extract

2

Renowned International Certifications

FDA regulation complied
GMP certified

3

Advanced Technologies

Peptide and Carnosine
Tencel Sheet

MAIONE™ FLEXIBLE LIPOSOME MASK

6

Safety Guarantees

No Antibiotic & Artificial Flavor
& Animal Cruelty
No Bleach & No Emulsifier
No Hormone & Heavy Metals
No Mineral Oil & No Pigment

5

Significant Effects

Help with Oil Balance
Retain Moisture, Hydrate Skin
Lift and Firm
Help Repair Skin
Relieve Sensitivity

4

Major Natural Ingredients

Hyaluronic Acid
Algae Extract
Rosewood Oil
Plant Protein (Wheat)

2 Renowned International Certifications: Facilities

YIJIA production plant is located in Los Angeles and Malaysia. YIJIA insists **on using the finest raw materials and the most advanced technology to achieve the best results.**

The production plant located in a prime location covering 80,000 square feet in San Gabriel, Los Angeles, USA has operated since 2006. Furthermore, it's also certified by GMP standards and FDA; at the same time with HACCP, HALAL and UL qualifications; YIJIA also adopts the equipment of German Bosch and Korean BoChang and sets up a total of 14 automatic production lines thereby achieving high standards and strict requirements.

3 Advanced Technology: Flexible Liposome

LIPOSOME TECHNOLOGY

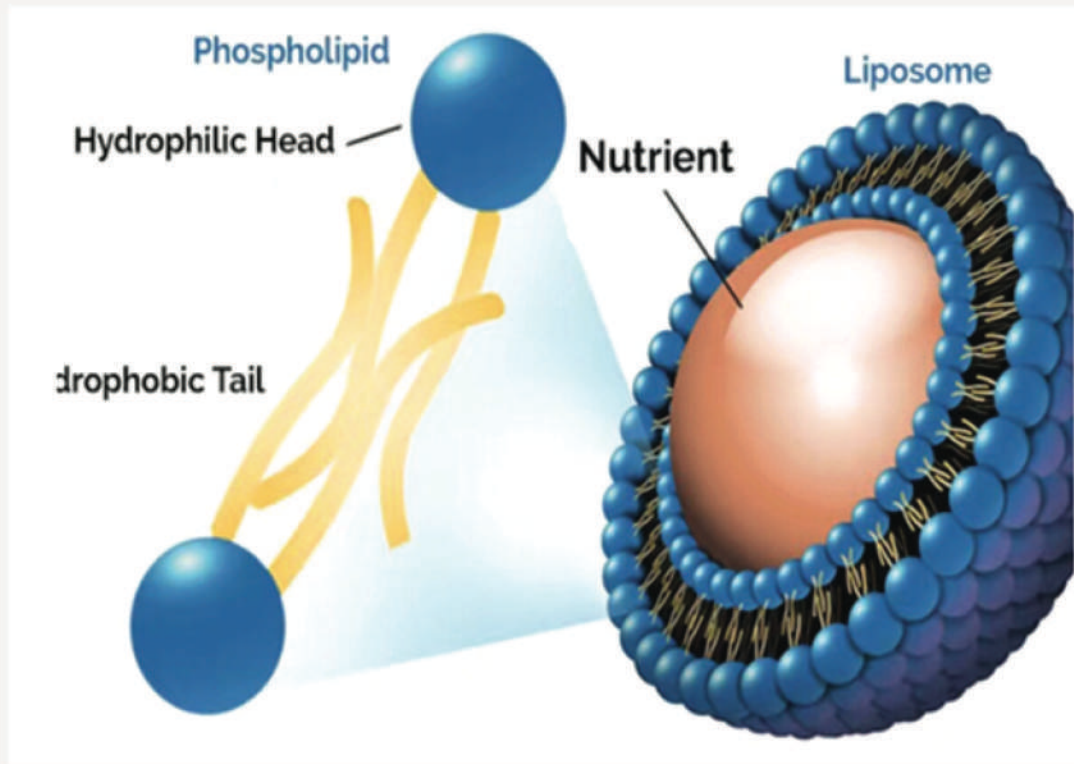

Many other products
Nutrients were hardly
absorbed from cuticle
layer into Epidermis

YIJIA product with
Liposome Technology
Bioactive Molecules penetrate
accurately through cuticle layer
into the Dermis

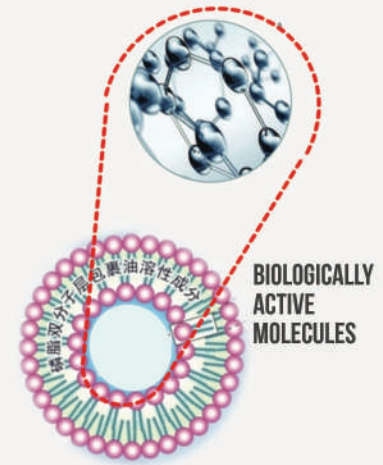

3 Advanced Technology: Flexible Liposome

LIPOSOME TECHNOLOGY

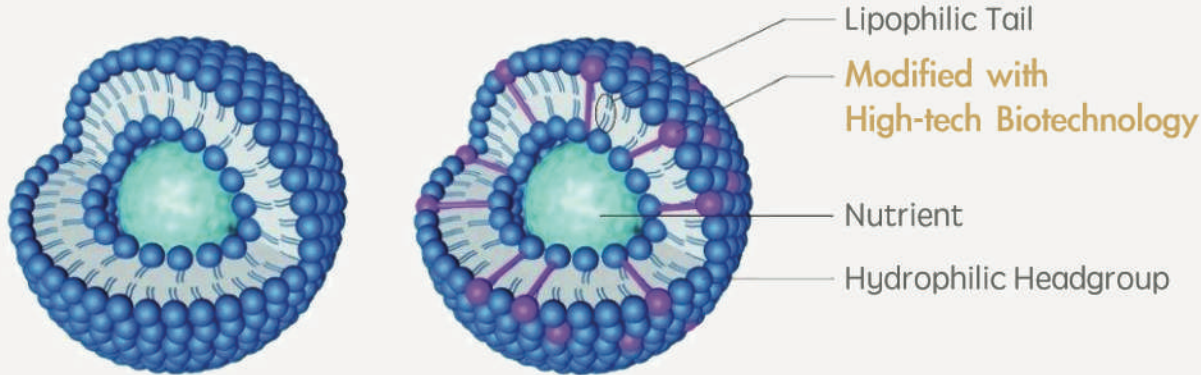

The liposome is a type of lipid-like spheroid, which is a sealed vesicle of the bilayer lipids formed by phospholipids. Due to its biofilm-like structure, it is also named Artificial Biofilm. The artificial bio film is hydrophilic and lipophilic. Liposomes also have the same bilayer structure as the skin cells. Therefore, liposomes have the decent permeability to the lipid barrier of cuticle layer.

Flexible Liposome is highly hydrophilic and self-deformed. It can efficiently pass through lipid aggregates that are much smaller than its own. In addition, flexible liposome also induces large molecules to penetrate the skin surface by encapsulating the biologically active molecules such as active macromolecules, active small molecules, and active oligopeptides. It helps to deliver the nutrients accurately from cuticle layer to dermis.

3 Advanced Technology: Flexible Liposome

WHAT ARE THE ADVANTAGES OF FLEXIBLE LIPOSOME COMPARED TO NORMAL LIPOSOME?

Normal Liposome

Flexible Liposome

Intensive Self-deformation

Better Penetration

Compared with the normal liposome, Flexible Liposome is highly self-deformed. It can efficiently pass through skin pores that are much smaller than its own.

Accurate Targeting biotech

Flexible liposome is the latest targeted therapy carrier. It is currently applied on beauty and skincare. Flexible liposome also induces the bioactive molecules accurately penetrating the epidermal layer into dermis. It has the outstanding characteristics of skin-friendliness, non-toxicity and intensive permeability.

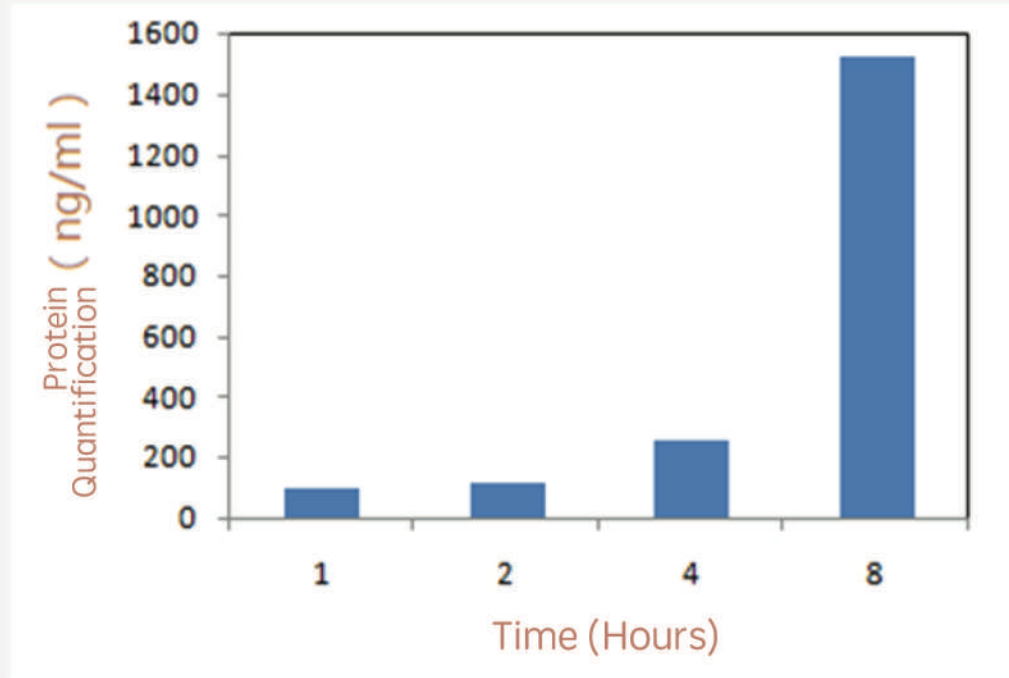

Enhance the Absorption & Efficacy

Transdermal Penetration

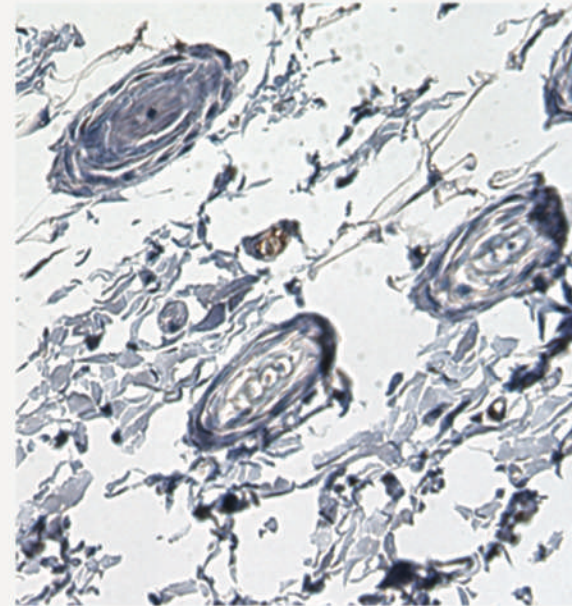

The conspicuous strengths of flexible liposome are both in transdermal volume and transdermal rate. Flexible liposome creates the delivery channels between the cuticle layer and dermis thereby efficiently improving transdermal penetration of nutrients.

3 Advanced Technology: Flexible Liposome

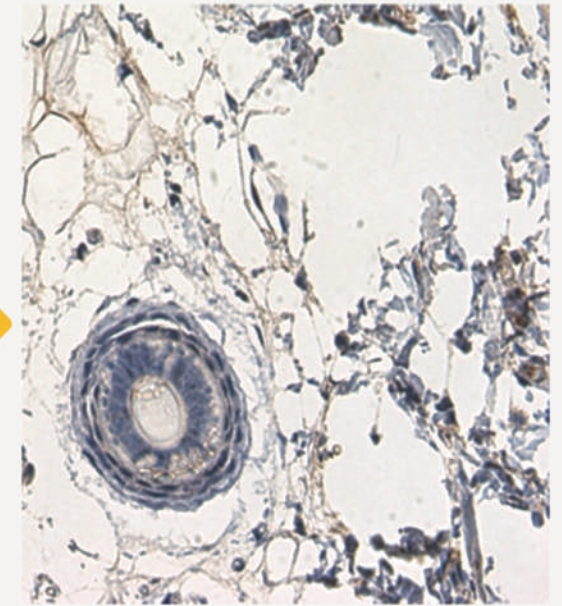

EVIDENCE OF SKINCARE EFFICACY

The diffusion cell test systems have verified that the nutritional level of skin cells gradually improves and the skincare elements are completely absorbed after 8 hours

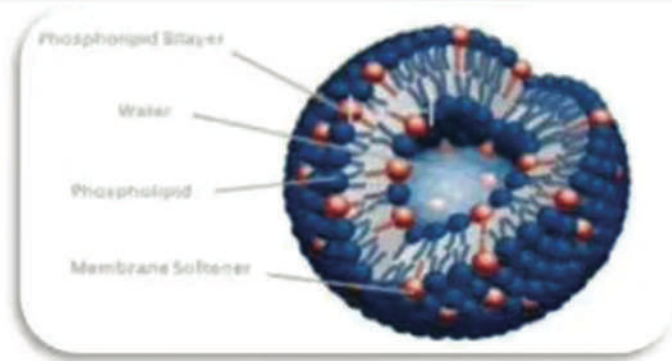

A. Before

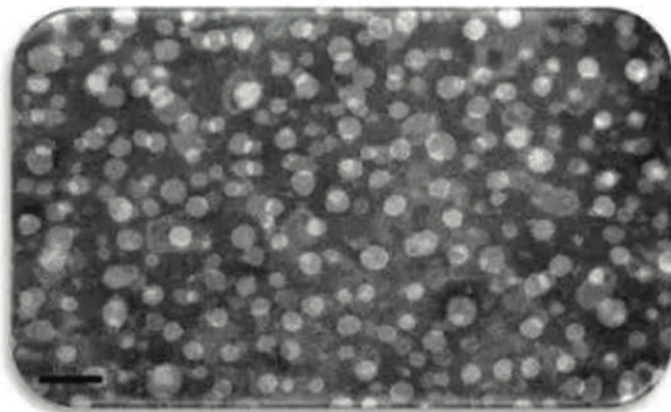

B. After 8 hours

Effective nutrients activate and repair the damaged skin cells. Withered and dehydrated skin also regains moisture and full of vitality

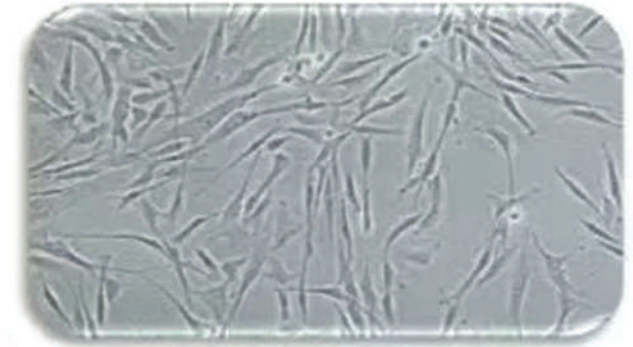

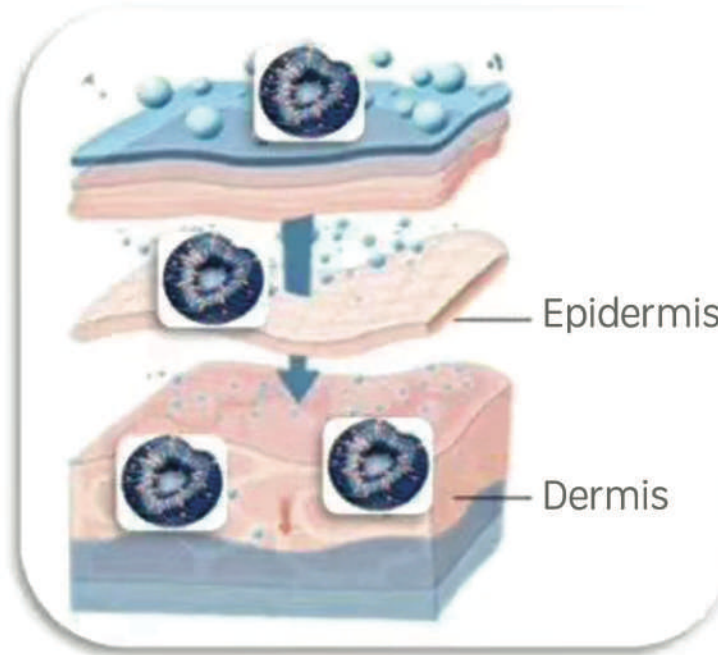

3 Advanced Technology: Flexible Liposome

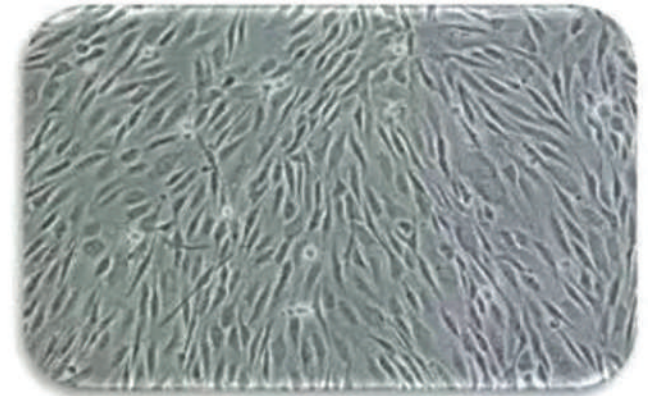

Flexible Liposome

Nanoparticles smaller than 100NM under the electron microscope (* 100,000 times) materialize the transdermal transmission of cosmetic active ingredients.

Before – sparse fibroblasts

After – fibroblasts increasingly grow and full of collagen

3 Advanced Technology: Polypeptides

STIMULATING THE REGENERATION OF COLLAGEN

Peptides are the compositions formed by α -amino acids linked together by peptide chains. It is also an intermediate outcome in the process of proteolysis. Generally, the number of amino acids included in a peptide is 2 to 9. In light of the numbers of amino acids in a peptide, the peptide has different names: a compound formed by dehydrating and condensing two amino acid molecules is called a dipeptide. Similarly, there are tripeptides, tetrapeptides, pentapeptides, etc., up to nonapeptides. Polypeptides are the compounds usually formed by the dehydrating and condensing compositions of 10 to 100 amino acid molecules.

Their molecular weight is less than 10,000 Da (Dalton) and it can easily penetrate semi-permeable membranes without being precipitated by trichloroacetic acid and ammonium sulfate. In addition, a peptide composed of 10 to 50 amino acids is named polypeptide; a peptide composed of more than 50 amino acids is called protein. In other words, protein is also known as polypeptide and polypeptide is sometimes described as peptide for short. These biological molecules were discovered in the 20th century.

3 Advanced Technology: Tencel Material

TENCEL MATERIAL

Botanical fiber is utilized as the raw material and it is naturally pure, non-chemicals and eco-friendly. It's light and translucent with only 0.1-0.2 mm thick. You may experience the sensational relief without compressing your skin. It carries 10 times the essence of itself with the intensive absorption therefore you may enjoy the long-lasting nourishment. It can perfectly fit for everyone, It's also gently wrapped and stretched on any face shape and which makes the perfect skincare.

10 TIMES MOISTURIZING POWER
UNRIVALLED LONG-LASTING NOURISHMENT

3 Advanced Technology: Tencel Material

70% of facial masks fabrics on the market are "non-woven".

Most of them are heavy, unconformable and unbreathable.

Many others are either too thin or loose structured.

Major Natural Ingredients

Hyaluronic Acid
Algae Extract
Rosewood Oil
Plant Protein (Wheat)

4 Major Natural Ingredients: Hyaluronic Acid

HYALURONIC ACID

Moisturizing, Hydrating and Nourishing

Hyaluronic acid is commonly known as Hyaluronan; abbreviated HA. It is the best hydrating replenishment found in nature. It is called the "ideal natural moisturizing element", which intensively improve skin texture with water. HA maintains firmness, plumpness and softness of your skin.

4 Major Natural Ingredients: Algae Extract

ALGAE EXTRACT

Hydrating skin and boosting skin metabolism

Algae extract is extracted from the natural marine seaweeds, including brown algae extract and red algae extract. It is rich in vitamins, amino acids, natural minerals and seaweed polysaccharides. It can effectively release antioxidants, diminish free radicals, moisturize, anti-age and also repair skin damages. Algae extract contains large amounts of anions, which stimulate fibrocyte to produce collagen and elastic thereby improving skin metabolism, refining your lines and improving facial contour.

4 Major Natural Ingredients: Rosewood Oil

ANIBA ROSAEODORA DUCKE ESSENTIAL OIL (ROSEWOOD OIL)

Antibacterial, Repairing Skin cells,
Alleviating the Skin Disorder

Rosewood essential oil is extracted from the core of wood named Aniba Rosaeodora. There is only one place of origin in Brazil. It features the effectiveness of soothing the tensions, calming, astringently toning and stabilizing the skin. It tastes like Ginger Lilies and it also has a fruity sensation of youth. Therefore, it's described as one of the most special wood essential oils. Rosewood oil also has the antiseptic and bactericidal effects on the skin and it may light up your mood as well. Moreover, it's also suitable for sensitive and wrinkled skin due to the efficacies of cells regenerating and anti-aging. Aniba Rosaeodora Ducke Essential Oil has anti-inflammatory effect, which helps to inhibit the growth of acnes, smooth the scars, and allay the wounds. It fits for sensitive, dry, dull and unbalanced combination skin.

4 Major Natural Ingredients: Plant Protein (Wheat)

PLANT PROTEIN (WHEAT)

Repair Skin barrier and Firm

It has instantly film-forming ability. It forms a light and protective film on the skin surface thereby enhancing the resistance of the skin to the pollutions. In addition, it firms skin, improves facial contour and accelerates regeneration of skin cells.

5 Significant Effects

MAIONE FLEXIBLE LIPOSOME MASK

HELP WITH OIL BALANCE

1

Promptly adjust skin's water-oil balance, help the pores breathe, reduce blackheads and acnes and maintain your skin clear and healthy.

RETAIN MOISTURE, HYDRATE SKIN

2

Reduce pigmentation and dullness, Maintain radiant, full and firm skin.

LIFT AND FIRM

3

Boost skin metabolism, tighten skin, keep skin energetic and hydrated.

HELP REPAIR SKIN

4

Soothe redness, dryness and irritations; strengthen skin barrier and even your skin tone.

RELIEVES SENSITIVITY

5

Quickly replenish antioxidants to your skin, diminish inflammation, and stimulate skin self-healing power.

MAIONE FLEXIBLE LIPOSOME MASK

1. This product is suitable for all skin types.
2. For better results, combine with MAIONE Advanced Youth Original Essence or other MAIONE products.
3. This product is only for external use.
4. Please stop using it immediately if there's any discomfort and follow the instructions of the doctors.
5. Product specifications: 25ml / piece

MAIONE FLEXIBLE LIPOSOME MASK

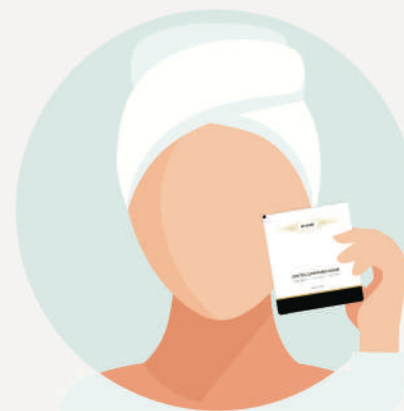

SPA REGIMEN

After cleansing, gently place the mask over your face. Please avoid direct contact with your eyes

Evenly adjust the mask to fit your facial contours

Remove and discard the mask after 15–20 minutes

Gently massage the remaining essence into your skin

Apply the masks for 15 minutes everyday, the wrinkles go away!

MAIONE FLEXIBLE LIPOSOME MASK

Applying 2-3 pieces
of masks per week?

Use it WHEN YOU FEEL LIKE IT.
